PROFESSIONAL SUMMARY

Cloud computing professional with hands-on experience designing, deploying, and managing scalable and secure cloud architectures, with a strong focus on cost optimization, reliability, and disaster recovery. AWS Certified Solutions Architect – Associate with proven experience delivering real-world cloud projects involving automation, monitoring, high availability, and multi-tenant SaaS design.

EDUCATION

Er. Perumal Manimekalai College of Engineering Bachelor of Technology (B. Tech) in Artificial Intelligence and Data Science Current GPA: 8.42 / 10.0 (end of 6th semester)	Hosur, India Aug 2022 – Jun 2026
Aadvith International Academy (CBSE) – 12th Percentage – 64%	Hosur, India Jun 2020 – May 2022
Eden Garden English School (CBSE) – 10th Percentage – 81%	Krishnagiri, India Jun 2019 – Mar 2020

SKILLS SUMMARY

Cloud Platform:	Amazon Web Services (AWS)
Core AWS Services:	EC2, S3, IAM, VPC, RDS, CloudWatch, Route 53, Auto Scaling, ELB, AWS Budgets, CloudTrail
Architecture:	High Availability, Fault Tolerance, DR Strategies, Cost Optimization, Shared Responsibility
Networking:	Public/Private Subnets, Route Tables, IGW, NAT, Security Groups, NACLs
DevOps:	Git, GitHub, CI/CD Basics, Linux Fundamentals
Scripting:	Python (automation), Bash

WORK EXPERIENCE

ZIDIO DEVELOPMENT - INTERN	June 2025 – July 2025
- Developed a full-stack web analytics platform using the MERN stack, focusing on secure backend APIs and responsive user interfaces. - Deployed and managed application components on cloud infrastructure, gaining hands-on experience with cloud-based hosting and monitoring. - Integrated authentication, role-based access, and API security mechanisms for production-ready deployment. - Worked with cloud services for application deployment, storage, and logging, aligning full-stack development with cloud architecture principles. - Strengthened understanding of scalable application design, deployment workflows, and cloud-native best practices.	

CLOUD & SOFTWARE PROJECTS

Smart Cloud Cost Guardian (Cloud Project)	Jan 2026 – Present
- Designed a cloud-native cost monitoring system using AWS Budgets and CloudWatch to track service usage and spending thresholds. - Implemented automated alerts to notify users before cost limits were exceeded, promoting cost optimization. - Identified idle cloud resources and applied cost-efficient cloud usage practices.	
Disaster Recovery Automation Simulator (Cloud Project)	Dec 2025 – Jan 2026
- Designed a multi-region AWS architecture to simulate disaster recovery scenarios and service outages. - Implemented DNS-based failover using Route 53 to ensure high availability during region failures. - Evaluated recovery strategies by measuring RTO and RPO metrics.	
Smart Supply Chain Management	Feb 2025 – Mar 2025
- Developed a cloud-deployable enterprise system for logistics and inventory management, improving forecasting accuracy by 30%. - Integrated IoT sensor data and ERP APIs for real-time data processing and analytics. - Automated workflows to reduce manual operations by 40% and improve operational efficiency.	
Chatty – Real-time Chat Application	Nov 2024 – Jan 2025
- Built a real-time messaging app using Node.js, Express.js, and Socket.io with secure one-on-one chat. - Deployed backend services on cloud infrastructure with centralized logging and monitoring. - Optimized application performance to achieve response times below 200 ms.	

CERTIFICATIONS

AWS Certified Cloud Practitioner (CLF-C02)	Jan 2026
Validated foundational knowledge of AWS cloud concepts, core services, security, pricing, and the shared responsibility model.	
Full Stack Web Development (Udemy)	Oct 2023 – Mar 2025
Trained in building dynamic web apps with HTML, CSS, JavaScript, Node.js, Express, React, MongoDB.	
Cloud Computing (Infosys Springboard)	Aug 2024 – Nov 2024
Gained foundational knowledge of cloud concepts, AWS, Azure, and Google Cloud.	
Python Bootcamp: Zero to Hero (Udemy)	Nov 2022 – Sep 2023
Mastered Python programming, OOP, file handling, and real-world applications.
