## PROFESSIONAL SUMMARY

Cloud computing professional with hands-on experience designing, deploying, and managing scalable and secure cloud architectures, with a strong focus on cost optimization, reliability, and disaster recovery. AWS Certified Solutions Architect – Associate with proven experience delivering real-world cloud projects involving automation, monitoring, high availability, and multi-tenant SaaS design.

## EDUCATION

|                                                                                                                                                                                                |                                                  |

## SKILLS SUMMARY

- Cloud Platform:** Amazon Web Services (AWS)
- Core AWS Services:** EC2, S3, IAM, VPC, RDS, CloudWatch, Route 53, Auto Scaling, ELB, AWS Budgets, CloudTrail
- Architecture:** High Availability, Fault Tolerance, DR Strategies, Cost Optimization, Shared Responsibility
- Networking:** Public/Private Subnets, Route Tables, IGW, NAT, Security Groups, NACLs
- DevOps:** Git, GitHub, CI/CD Basics, Linux Fundamentals
- Scripting:** Python (automation), Bash

## WORK EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                              |
